

About Xpressfill

Vigneron Specialty Products was founded in 2004 by a Silicon Valley Engineer and Winemaker. Vigneron is currently under the ownership of Randy and Judy Kingsbury, who are actively infusing the business with technical expertise, fresh ideas, energy and enthusiasm. Randy and Judy's backgrounds bring a vast spectrum of experience to the company and they share a common passion for customer service. Randy has 25 years of experience in engineering design and Judy's background includes 20 years in the restaurant and wine industries. A complete redesign has been implemented on the Vigneron bottling machine, the XpressFill. The accuracy rate is currently within 1.5ml on a 750ml bottle (0.2%). Vigneron's premium bottle fill systems are designed with the highest quality components to ensure long life and ease of application. Those customers who purchased a machine prior to the change of ownership will be very pleased with the improvement in quality and precision. The latest models are equipped with electronic controls and are extremely user-friendly. In addition to the emphasis placed on improving the quality of the XpressFill machines at Vigneron, Randy and Judy have put a tremendous amount of energy into improving the customer service as well. We are confident you will be happy with the changes we have enacted, and look forward to serving your bottling needs.
